Display QoS marking values

You can display the QoS marking values for different protocols, for each IPspace.

Step

Display QoS marking values by using the `network qos-marking show` command.

The following command displays the QoS marking for all protocols in the default IPspace:

```
network qos-marking show -ip-space Default
IPspace          Protocol          DSCP  Enabled?
-----
Default
                CIFS                10    false
                FTP                  48    false
                HTTP-admin           48    false
                HTTP-filesrv        10    false
                NDMP                 10    false
                NFS                  10    true
                SNMP                 48    false
                SSH                   48    false
                SnapMirror           10    false
                Telnet               48    false
                iSCSI                10    false
11 entries were displayed.
